EDUCATION

Cebu Roosevelt Memorial Colleges | 2022-2026

Bachelor of Science in Information Technology

- Relevant Coursework: Full-Stack Development, Data Structures & Algorithms, Database Management Systems (DBMS), Statistics, Machine Learning

Ilihan Integrated School | 2017-2022

Junior & Senior High School – General Academic Strand

- Developed foundational skills in academic research, technical communication, and problem-solving.
-

EXPERIENCE

Full-Stack Developer (Consultant) | May 2026 – July 2026

- Developed both the client-side interface and server-side infrastructure for QrWise Clinic, a POS and marketing platform.
- Built and implemented REST APIs and user interfaces for the project using TypeScript, Next.js, React, and Supabase.

Back-End Developer (Intern) | January 2026 – April 2026

- Completed 540 hours for a college practicum subject, focusing on the server side and database management for Everyshelf, an inventory and stock transfer system.
- Designed the database schemas and developed REST APIs for the project using TypeScript, Next.js, and Supabase.

Lead Full-Stack Developer (Capstone Project) | August 2025 – December 2025

- Successfully defended BogoBallers, a league management system developed using Python (Quart) and SQLAlchemy with Role-Based Access Control (RBAC).
 - Created web and mobile interfaces for the project using React and Flutter for real-time match tracking and player statistics.
-

ACHIEVEMENTS & AWARDS

Outstanding Intern of the Year | May 2026

- Awarded during graduation for demonstrating exceptional technical performance and reliability throughout the internship period.

Full-Stack Developer of the Year | May 2026

- Recognized during graduation for excellence and implementation in end-to-end application development.

Best in PC Troubleshooting | May 2026

- Honored during graduation for demonstrating outstanding practical skills in hardware diagnostics and system problem-solving.

School Representative | June 2025 – July 2025

- Selected as the school representative to compete in the ISITE National Python Contest, solving advanced algorithmic challenges using Python within a strict 3-hour limit.
-

SKILLS

Languages: JavaScript & TypeScript, Python, C#, PHP, Dart

Frameworks/Libraries: Next.js, React, Flutter, React Native, FastAPI, NestJS, .NET Web API

Backend & Database: Supabase, PostgreSQL, MySQL, Drizzle ORM, Zod, REST APIs

Tools/Technologies: Git, GitHub, Google Cloud Console, Docker, Cloudflare
